Experience

Intapp

Senior Visual Designer, Design Systems | 2022 - Present

Defined Intapp's foundational design language, typography, color, grid, and iconography, in partnership with another visual designer. Designed roughly 35 Figma components that became the system's foundation, working closely with three UI engineers and a director who built them out as a coded web component and React library. Established documentation standards across component and pattern guidance in Zeroheight. Led an independent effort to map the full system to dark mode. Supported adoption across three product teams through regular office hours with engineering and design.

IBM Security & Quantum

Visual and UX Designer | 2018 - 2022

Created design concepts from user research and testing, expanding them into prototypes and high-fidelity designs in close collaboration with development. Facilitated design thinking workshops to align cross-functional teams around meaningful action plans.

University of Texas & IBM

Teaching Assistant | Fall 2021

Lead and mentored a team of senior students in an incubator project for an advanced design thinking course sponsored by IBM.

Sumo

UI/UX Designer | 2017 - 2018

Executed a complete brand and product redesign, from competitive audits and wireframes through prototyping, user testing, and final implementation with developers.

Dick's Sporting Goods

UI Designer | 2014 - 2017

Created digital design assets for DSG's eCommerce site, collaborating across merchandising, development, and marketing. Directed product photoshoots and mentored new hires.
